

INSIDE.60 grows with your requirements. With its clear-cut, elegant looks the screen system is more than just part of an attractive interior design. Its rapid, tool-free assembly and light-weight, modular construction makes it particularly functional, flexible and economical: the screens, which are available in different heights, can be reconfigured or extended exactly as required without high costs for installation and subsequent use.

Always well-connected. INSIDE.60 offers a variety of options for individual workstation wire management. Computers, telephones and other devices can be connected as required, either at skirting board height or at desk height. Electricity can come from individual power supplies or via wire management directly integrated in the screen. As a result it always looks neat and tidy behind the desk.

Light, structure, more space. A wide range of material and module variants makes it possible to design the room almost any way you like. The lightweight frameless appearance of INSIDE.60 is stylishly complemented by the coordinating organiser elements: the selection ranges from task lights and magnetic infoboards to shelves. This means that individually-designed workstations fit harmoniously into the overall room structure.

A photograph of a modern office cubicle. The cubicle walls are covered in bright lime green acoustic panels. On the left wall, a grey panel holds a document with two black pushpins. A white shelf is mounted on the wall, holding a stack of papers. A single yellow tulip is tucked into a slot in the wall. A white desk is positioned in front of the cubicle, with a computer monitor, a keyboard, and a mouse. A black office chair with a mesh back is partially visible in the foreground. A desk lamp is mounted on the wall above the desk. Large windows in the background offer a view of a city skyline.

Concentrated working. Even though there's always something going on in the Open Space. With INSIDE.60 you can quickly create individual spaces for people to think in peace away from the hectic noise of the office. The acoustic versions of these elements not only meet extremely high technical standards, but also aesthetic requirements. As a result, everyone enjoys an all-round feeling of well-being at work.

Whatever you're planning: INSIDE.60 is always the right answer. The fact is, it's an intelligent solution from concept to details.

1 | Expandable: the modular system with rapid tool-free assembly in T, L, X and Y configurations.

2 | On top: individual clip-on power supplies are available for the electrics.

3 | Powerful: the electrics can also be integrated into the screen.

4 | Clever: the optional privacy screen.

5 | Effective: the "acoustics inside" label represents highly efficient acoustic materials.

6 | Spontaneous: the adjustable glide means that you can compensate for height differences quickly and easily.

7 | Robust: the cantilever feet on both sides ensure stability.

Design and function in perfect combination. The clear lines are used throughout the system, even for the organiser elements and other extras.

8 | Personal: individual accessories, for instance a magnetic board or flower vase.

9 | Welcoming: slot-in shelves provide display space.

10 | Discreet: integrated cable ducts in the modules run horizontally and vertically.

11 | Confident styling: the glass fins as a design feature and the frameless styling create an impression of lightness.

12 | Tidy: there are concealed slots so that the shelf can be positioned to suit individual requirements.

13 | Illuminated: the accessories include matching lamps.
